

COOKING OVER COALS AND BACKYARD CONVERSATIONS

An earth oven is one of the simplest and most ancient cooking structures. The earliest known earth oven was discovered in Central Europe and dated to 29,000 BC. An earth oven is a pit in the ground used to trap heat and bake, smoke, or steam food to give it a unique earthy soil baked flavor, still today being used in New Zealand, Latin America and islands in the South Pacific, also now perfected by Luna Beer Garden here in Bali.
